# "Leading with Personal and Professional Intelligence"

# M. Semi Bird Associate Director – Senior Instructor WSU Tri-Cities Leadership Academy

Personal and Professional Intelligence (PPI) theory is a qualitative and quantitative framework which underpins a leader's social cognitive ability to effectively engage with employees and stakeholders alike.

PPI is a methodological framework that enhances leader self-awareness and leverages environmental awareness to maximize team member performance and drive operational excellence.

The ancient Chinese general and philosopher Sun Tzu once said, "If you know the enemy and know yourself, you need not fear the result of a hundred battles. If you know yourself but not the enemy, for every victory gained you will also suffer a defeat. If you know neither the enemy nor yourself, you will succumb in every battle."

PPI begins with a comprehensive understanding of an individual's natural style of leadership. A high performing leader has the ability to seamlessly and heuristically leverage his or her knowledge, skills, and abilities toward mission success with confidence and conviction. Arguably, understanding your natural style of leadership makes you a more effective and authentic leader by leveraging your true self.

In this presentation, M. Semi Bird, internationally acclaimed educator, instructor, and author, will share how his exploits and experiences as a combat tested Special Forces Green Beret led him to create the PPI theory and why he thinks it's a game changer for leading in the 21<sup>st</sup> century.
