

Glenn Gruner has been a Quality Assurance leader for over 30 years. Since earning his Bachelor of Mechanical Engineering degree from the University of Minnesota (go Gophers!), he has worked in California, Wisconsin, Michigan, Indiana, Michigan (again), Ohio, Michigan (a third time), Kentucky, Pennsylvania, and finally, Washington. It was his great fortune to be recruited to the wonderful Pacific Northwest by Key Technology, where he is currently Quality Manager. He is enjoying the reduced stresses of the area and company after a long career mostly in the automotive industry.

Glenn has been a member of ASQ for about 30 years and has held leadership positions in other sections prior to joining Section 614 in 2010.
