Denise Fast

Section Chair

Denise Fast is an ASQ Certified Software Quality Engineer and has been an ASQ member since 2009. She holds a BA degree in Business Administration with a minor in Management Information Systems from Washington State University.

Denise is currently the Change Control Governance Lead at Washington River Protection Solutions, working at the Tank Farms to model tank waste transfers at the Hanford Site.

Denise has software experience in both the private and government sector ranging from a subject matter expert to software owners on the implementation of the software life cycle deliverables, performing software quality oversight, development of new products for a telecommunications company, to providing software technical support to software owners to effectively comply with the requirements.
