

Marcus Aranda

Secretary

Marcus Aranda has been in the analytical chemistry and nuclear industry for over 12 years. He has his bachelors in Bio-Chemistry and is a Certified Quality Engineer, Certified Project Management Professional and Certified Lead Auditor.

Throughout his career, Marcus has held the positions of Lead Chemist, Quality Scientist, Quality Manager and Project Manager. His career first started at Columbia Basin Analytical/RJ Lee Group where he performed various types of analyses including classical wet-chemistry, inorganic and organic analyses. He then moved on to the 222-S Laboratory, supporting waste characterization of legacy tank waste from the Hanford Tank Farms in several roles including Quality Scientist, Quality Manager and Project Manager. During this time, he also served as a voting member of the HASQARD (Hanford Analytical Services Quality Assurance Requirements Documents) Advisory Board.

Marcus is currently employed with Pacific Northwest National Laboratory as a Quality Engineer. His primary role is the Quality Program Manager for Nuclear Forensics. He also supports the Tritium Technology Program and PNNL Audit Program.
