Tom Dunn and Marty Abbott MyGemba and Incentives Management Group

Organizations have always strived to improve the way they conduct their business, whether it is to cut costs, increase ROI, enable better, more effective training, or realize a better business process through lean implementation. This is especially relevant now, as many organizations have had to drastically change their business structure and strategy to accommodate new regulations. Finding ways to solve these new challenges along with old ones is crucial for organizations to function and survive.

At MyGemba, they created a platform in which an organization can train, track, and manage improvement projects all in one place. This was developed to help increase the quality of work, by enabling better leadership engagement, project alignment, and/or business impact. MyGemba also improves CI sustainability by offering better project tracking, deployment transparency, and client transformation. Being cloud based, it enables process improvement services to be delivered in-person or virtually, allowing users to walk step-by-step through projects all while having access to information and tools to easily complete tasks. Since every organization is different and has different needs, the system is easily customizable to fit the CI needs of the organization.

Tom and Marty will share some of the ways MyGemba can be utilized by organizations to improve and enable better process improvement efforts.

About the speakers: Tom Dunn is a Lean Six Sigma Master Black Belt and a technology guru who has spent 37 years implementing process improvements both as a senior management employee and as a consultant. Tom developed the MyGemba Improvement Management Software system approximately 20 years ago to help others effectively train, manage, and track process improvement projects. 5S, KAIZEN, LEAN, Toyota Kota, Six Sigma, etc..., are all managed in one place.

Marty Abbott has over 15 years of company experience and over 30 years' experience providing services to corporations. Most recently, he has been leading a premier services organization negotiating incentives for corporations to enhance capital investment ROI and improving skills development to achieve business goals as President and Founder of Incentives Management Group, Inc. .
