## Coming Climate Crisis

### Whatcha Gonna Do When it Comes for You?

**Richard W. Emory, Jr., Attorney and Author**

**David M. Saunders, Author and CC-P**

Global climate change has already had noticeable impacts on the environment. Ice on rivers and lakes is breaking up earlier, glaciers are shrinking, animal and plant ranges have shifted, and trees are flowering sooner. Effects that scientists predicted in the past would result from global climate change are now occurring, including loss of sea ice, accelerated sea level rise and longer, more intense heat waves.

We are hearing a lot about climate change these days. Climate impacts all of us. Extreme heat, heavy downpours and flooding will affect future infrastructure, health, agriculture, forestry, transportation, air and water quality, and more.

How might climate change impact your company and your role as a quality professional? What can you do to prepare? What can be done to prevent catastrophic outcomes?

Presenters Richard W. Emory, Jr., and David M. Saunders will: provide scientific evidence of climate change, discuss legal, social, and political issues, and suggest actions for the future.

*About the Speakers:* Richard W. Emory, Jr. was a career environmental enforcement attorney who retired in 2011 from the U.S. Environmental Protection Agency. He is the author of *Fighting Pollution and Climate Change: An EPA Veterans' Guide How to Join in Saving Our Life on Planet Earth*, and holds a BA from Yale and a JD from Harvard Law School.

David M. Saunders, now retired, is a certified Climate Change Professional, and served as Senior Director of Quality for ResCare, a human services company with 45,000 employees. He is the co-author of *Four Days with Dr. Deming, Measuring Customer Satisfaction*, and *Voice of the Customer Guide*. He earned a BA from Hobart College and an MS from Pratt Institute.
